Machine Translation at the European Commission

Claus Thornby Larsen Language Technology Coordinator Directorate-General for Translation

DGT in figures

- Directorate-General for Translation (DGT) is the Commission's internal LSP
- 24 Language Departments. 1300 translators (Danish language: 55 translators and 8 assistants (Luxembourg/Brussels))
- Translation of legislative documents (50 %), reports, communication and web content into mother tongue
- Translates between 2.3 and 3 mio. pages/year
- Outsourcing (approx. 38 %)

Equality of languages and technology?

- Euramis (multilingual database with all translated text)
- IATE (Interactive Terminology for Europe)
- CAT Tool (Computer-Assisted Translation Tool)
- eTranslation (internally developed)
- Quality Assurance tools (internally developed)

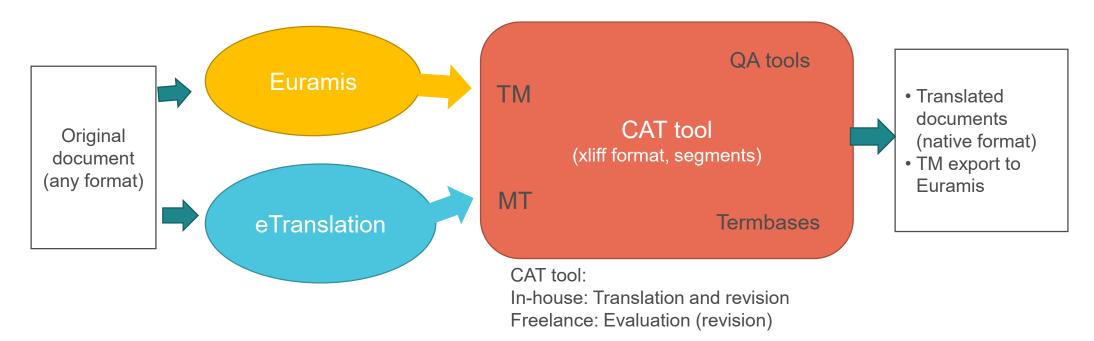

Machine translation at the EU – past and present

- Systran (rule based). Low quality and language coverage
- MT@EC (2012-2018): Statistical machine translation
- eTranslation (2018 >): Neural machine translation
- Al (new): Quality estimation/language recognition/summarisation/anonymisation/classification (Eurovoc)

Our workflow: Language technology tools

 Translation memories (TM) and machine translation (MT) are retrieved automatically for each translation project

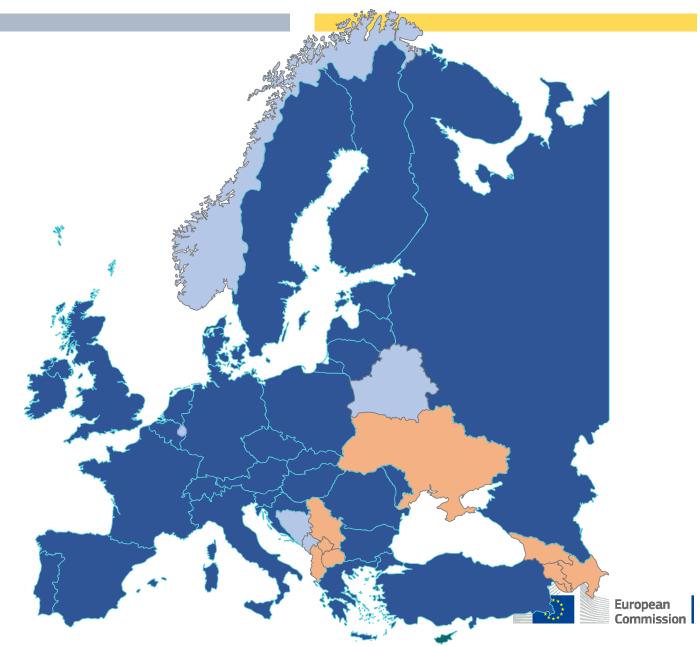

eTranslation language coverage

+ 3 non-European languages: Mandarin Chinese, Japanese, Arabic

Important facts about eTranslation

- All official EU languages (plus Norwegian, Icelandic, Russian, Chinese, Japanese, Turkish, Arabic)
- Neural machine translation trained with (mostly) own data
- > 185 million translated pages (2021)
- 250 million requests (2020)
- Developed by DGT, but available to all European public administrations, SMEs, freelance translators and universities

One system – Two audiences

- Translators and staff of the EU institutions
- Digital services of the EU institutions
- Websites of the Commission and the other European institutions

DGT eTranslation

- CEF Digital Service Infrastructures
- Pan-European digital public services
- Public administrations in the Member States
- Small and medium-sized enterprises

CEF eTranslation

NMT pitfalls – What to keep an eye on

- At first glance, sentences translated with NMT look convincing (fluency/syntax)
- However, semantics and terminology must be checked
- Typical mistakes:
 - inconsistent terminology
 - meaning (wrong/inaccurate)
 - omissions/additions
 - negations (omitted or added)
 - made-up words

Terminological consistency

The Commission will ensure that the climate tracking methodology is accessible, transparent, and publicly available.	Kommissionen vil sikre, at klimasporingsmetoden er tilgængelig, gennemsigtig og offentligt tilgængelig.
The Commission will exchange views on the climate tracking methodology with the European Parliament and Council.	Kommissionen vil udveksle synspunkter om klimasporingsmetoden med Europa-Parlamentet og Rådet.

MT mistakes can be politically sensitive

- Facebook: Xi Jinping -> 'Mr. Shithole' (burmesisk-engelsk)
- EU-tekst: Kalkun i stedet for Tyrkiet ('Turkey Gate')

Metaphors/idioms – tricky!

...a challenge for all MT engines

Training neural MT engines

- All systems use similar software
- Quality depends on the available data and the 'cleaning' thereof
- Training an engine takes several days
- Two separate translation engines for each language pair are trained, e.g.:

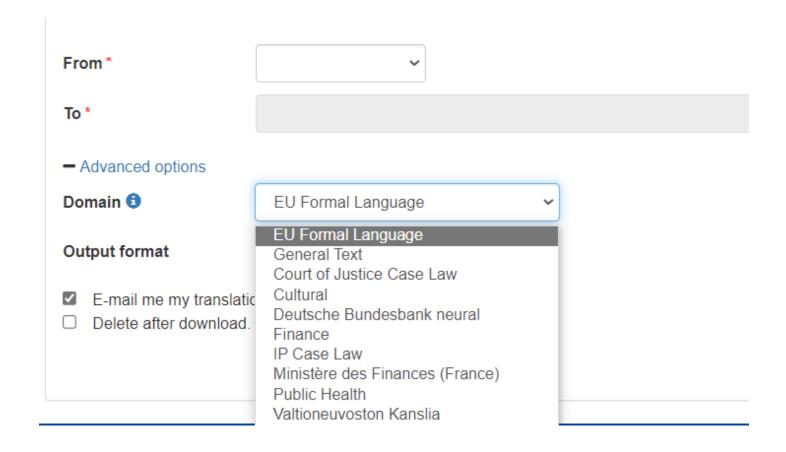

English -> Danish

Danish -> English

• 254 new or upgraded engines in 2020

Quality data/data curation

Whether photos or languages: Best results obtained with clear and correct data.

Legislative vs. general text

General language: Several linguistically correct translations

Legal language: Only one legally correct translation

In legislative documents

- > quotes must be verbatim
- defined terms must be used consistently

Moreover, a legal act is often composed of bits and pieces from other legal acts (Regulations, Directives, Decisions, EU Treaty).

Consistent use of defined terms
